

## A GROWING EDUCATIONAL HUB

- Stratford is a growing area for higher education, with UCL locating to a huge new campus in the Queen Elizabeth Olympic Park, UCL East.
- The University of East London is already based in Stratford and the area is a growing hub for students to live, socialise and study.
- Unite Students already successfully operate over 1,700 student beds in Stratford at Angel Lane and Stratford ONE and are looking to add to this to meet the future demand for student housing in the area.
- There are significant benefits to having three Unite Students housing facilities in close proximity as these can be managed collectively and enhance a clear sense of community.
- The London Plan envisions students living close to their place of study and excellent transport links as this supports the principles of sustainable development.
